Subject: RE: More Dimock Data

I just started to compare the data, but the little that I have compared seem to show the two databases you sent me match up. It is the database I received from Cabot in early March that is not correlating. It also has many more residents, about a total of 121.

I plan on working on comparing the data bases today and will let you know what I find.

thank again for your help.

Rich

Hi Rich - Thanks for the update regarding this issue. If possible, could you let me know where you are finding the data discrepancies, e.g., specific parameters and data sources. I know Cabot switched over to a new database system relatively recently and so I am wondering if that is partially responsible for the inconsistencies. Is the earlier Cabot spreadsheet data I provided you for each COSA resident at least consistent with the DEP data I just forwarded to you today? This is definitely something that needs to be resolved soon in my opinion. Thanks again - Seth.

Thanks very much Seth.

I am finding what appears to be numerous errors in the Cabot provided data. Hopefully I am wrong, since if I am correct I will have wasted about 40 hours of time....

Subject: More Dimock Data

Hi Rich,

Per your request, please see the attached files. I apologize but I don't feel comfortable giving out Anthony Gorody's personal email address because I don't know him and I don't know if he uses it for business purposes – I only have it because it was included in an email that was forwarded to me by someone else. His LinkedIn page is here<<http://www.linkedin.com/pub/anthony-gorody/13/316/903>> and I think the address and phone number for his consulting business is here<<http://www.manta.com/c/mm3nc27/universal-geoscience-consulting>>. Hope this helps!

Seth
